Telegraphic Address:-"PRYKE, LONDON," Telephone No. 1812.

47 & 48, UPPER THAMES STREET,

November 1st. 1804.

DEAR SIR

We beg to hand you a copy of our NEW IBBUSTRATED CATALOGUE, which, although reduced in size, is largely increased in information, many new pages being ailded. We hope it will be the means of extended business with you, as we believe it to be the most comprehensive, handy, and useful book in

Great care has been taken to select saleable patterns, with a due regard to quality and price, and the Illustrations FAIRLY represent them.

We think, when fairly dealt with, Customers prefer dealing with one house to opening several accounts, and we have therefore included many Proprietary Patent Articles, now largely specified by Architects: the favourable prices quoted should ensure our having the orders for these.

\*\*\*\*\*\*\*\*\*\*\*\*

PRESENT DISCOUNT
TO THE TRADE ONLY.

25 

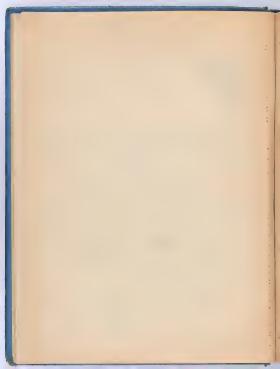

Except pages 638, 637, 638, 638a, and all after 688a, which are NETT, unless otherwise stated.

Should occasion arise through Market fluctuations, we reserve the right to alter the Discount WITH or WITHOUT NOTICE

Special attention is drawn to the notes re Carriage, etc., on page iii., and in conclusion we would assure our Customers that no effort will be wanting on our part to merit the support hitherto so liberally accorded us, for which we are exceedingly obliged, and remain.

Your obedient Servants.

PRYKE & PALMER.

#### CARRIAGE

NLESS apocal arrangements are made, all order executed from Lohdov Svocs, accent certifie forward; we can, however, if a little time to given, send consegnants of Stores, de., weighing 5 cuts and some form Worss respect to Gadoniar's accessed Storico, Gartingo paid right through, the execus (if any) beyond a rate of 30]- per ton being charged on invoice:

Derlans goods are delivered free to only Station in Great British wedoont any supulation except that orders

#### BREAKAGES.

the continuents except these named before, we note off. Relievy Changay's risk, and its receiving good contents on the properties to receive and sign only for what is in glood confining out disk may flook broken to treat the extremel by the name Van deliverage them, unled "Contrant Free-Bowies to account of the contraction of the cont

Our responsibility cases when Goods are delivered to Railway Companies in good condition and we hold their elect signature, and we cannot under any circumstances admit claims for damages.

#### PROMPT DELIVERY

E keep a good General Stock, and endearour as far an possible, to dispatch Goods from London Warehouses on receips of order

We also look Goods in restiness at the Works to be sent off immediately. It is obvious, however, in large manufacturing businesses there are times when delays owing to exhaustion of stock or strikes

#### BONUS TO LARGE BUYERS.

O encourage lings buyers, we nothertake to give a bount to any customer whose account during any one year from August 1st to the following August 1st, reaches

£200 net, £5 ... £400 net, £10 ... £750 net, £30 £300 ... £7 l0v ... £500 ... £15 ... £1.000 ... £30

The amount of bonus can be placed to the credit of the secount, or chaque ramitted, at customer's option

#### ACCOUNTS.

EW Accounts are only opened upon receiving two astisfactory Leedon Trade or Bankers' references.

### SPECIAL DISCOUNTS TO CASH BUYERS.

USTOMERS payour CASH once ORDER for goods at wittin mornioused processor an encoved the fel or ag

Orders executing £2, not exceeding £15, case discount 5 %.

£11, 255, 61%.

£20, 175, 230, 175%.

value £20, and upwards 10%.

Three discounts do not apply to 'Special' Quotatoens and Contracts, and it must be also ir nuclerated these counts are for CASH WITE ORDES, and no exception can be made.

The Times, December 29, 1894, asks, in a Leader on

## UR DAUGHTERS,"

"What will the little stock of accumulations which paterfamilias can hope to leave behind him, after he has paid for his son's education, provided for his widow, and been aggregated by the Chancellor of the Exchequer, yield his girls to live an and what other sources

## THE PROBLEM SOLVED

#### MAXIMUM HEAT MINIMUM FUEL

Din it ever strike you when sitting by the fireside that a great quantity of good, fresh, warm air was rushing up the chimney along with the smoke and fumes, and being replaced by cold air; that if this could be prevented less than half the quantity of coal

Crosthwaite's New Patent "COWL" Grate has been brought out to save this

As will be seen from the accompanying drawing a back hood is provided, and the any cooler air entering the chimney.

The back hood also prevents down-draught and soot falling into the fireplace, and saves the necessity of a flap or damper, or adjustable canopy.

These Grates burn a minimum amount of fuel for the great heat given out, and will in most parts of the country save their cost in one or two years.

# HOT-AIR "TIT-BITS" STOVE.

THE HOT-AIR "TIT-BITS" REGISTER STOVE with Oven in the Canopy

It is almost impossible to point out the numerous instances in which are from in the change of the late almost impossible to point out the numerous instances in which are from in the Brankfast Room and the state of the change of the state of the change o

The Oven is so arranged behind the Canopy as not to interfere with the ordinary appearance of a Register Stove, and at it, only by turning down the front plate of Canopy, which forms the door, that a good-sized Oven is disclosed; always warm when there is a five, and ready at any moment for me.

The Oven is loose and draws out to allow of chimney sweeping.

Sizes 36 in. × 38 inches, or 38 in. × 38 inches.

# THE "CLIMAX" RELIEF VALVE.

### \*\*\*\*\*\*\*\*\*

For the Prevention of Explosions in Kitchen and other Boilers.

PRICE - 3 inch, 10/-; 1 inch, 11/- each.

This Valve is in every way reliable, there being no mechanical appliances to get out of order,

It is Automatic in its action, and when once fixed requires no further attention.

The Material used being non-corrosive, it cannot fall to act in case of the stoppage of pipes by frost or any other cause.

It is tested to stand a pressure of 60 lbs., and at this indicates danger, although boilers rarely burst under a pressure of 150 to 200 lbs.

It has Advantages which no other Valve possesses.

In order to show the importance of every Boiler having a safety Vaive connected with it, we give below a partial list of the dreadful accidents which occurred during the recent severe frosts, and which might have been prevented by the use of this Valve.

### "THE STANDARD" of Jan. 6th and 8th, 1894,

Gives the following number of Explosions which occurred on the 5th and 7th January :-

One at "Lady Mary Scott," Piecadilly. Result-One child killed and two ladies injured.

Glasgow, at the Lady Artists' Club, from boiler bursting. Result—Two persons killed and two badly injured.
A kitchen boiler in Claveland House, East Finchley, exploded, killing the cook and the housemaid. The particulars given are too freadful to relate,

Another at Clarendon House, Upper Norwood. Result—Side of the house completely blown out

At Worcester. Kitchen wreeked and fire caused.

Again at Lewisham. Kitchen basement wrecked, and two garls terribly injured.

In Brighton, another kitchen completely wrecked.

Nos. 13 and 15, Hyde Park suffered from explosion. Result—No. 15, three persons very severely injure at At Liverpool and Dunden, at this date, several explosions happened, with injuries to several persons

10/- each.

7

The numerous Kitchen Boiler Explosions during the recent Frosts have rendered it imperative that all Kitchen Boilers should be protected by a Safety Valve. The above Valves are recommended as being simple, effective, and unable to get out of order.

# AUTOMATIC CURTAIN DOOR ROD.

Figure 1
Reprisents the Carters when burg in presson entirely covering the correct the lower portion being slightly weighted exclude all desarch free modernants the door.

Represents the Curious accommatically raising itself as the door is being opened; requiring its position on the door

The above sivention is to exclude 'reaght from our-ring a room through the cretices or undermosth a door, and is quite a new arrangement from any previous attempt for the same object.

The Curtain is suspended from above the top of the door, and works assonationly, relating itself from the floor upon

any one contemp the room, and the door more open closes itself. The arrangement is an exceedingly constanted as well as control addition in any room, and will supply a weak long bit.

1—The regulation statehed to the door bracket about the Carvata in the same position to bit edge of the door when open as when about, allowing the root to travel by steelf method of congruing the Certain, as a same), making it difficult to get, the bands wheather of the door to close of the control of the control

2 — The other end of the rod as provided in a measure that admits of the Curtain hanging govic close to the without employing a hinge joid as in the common rod.

Can be made in any size rod.

#### CROSSE'S ORNAMENTAL BRACKET VENTILATOR

Objection being taken in the case of old se existing hellbugs to cutting every the wall, we have designed this Reachet. It will be seen by the illustration that, unlike the so-called Brackets of other Markery, it is wady a Reached permitting of anything being placed on its lay without interfering with the regioning sit. This is a very handsome Stevalet, as in will strengly recommand baself.

## LISLE'S PATENT SELF ACTING CHIMNEY COWL.

### Pryke's No 1889.

Very highly recommended by penelizal uses for eliability and certainty of action. The Cord with its fixed masses invests on a splants fixed to use crewbes riverted to upper part of shaft, thosen passing through mo fixing, restrict or make at Gord late a hor containing a filts: spear which the Cord revolves.

PRINCE" CHIMNEY POT

## Pryke's No. 1888.

Prevente Down-draught

Scene of its Advantages

The arrangement of the Cones is such that is in impossible to blow down the take with a bellows placed in any mostless coulde the too

At the same time there is no obatreotics whatever to prevent the awney's broom clearing the whole way through

It is made orel in order to give the nimest space for the smoke to escape without making the hears too wide to stood idde by side on the stack

It is Fire-proof. The steel plate is crivited, and the whole galvenised after manufacture. Being made of stout material it will last for many years

The appearages is less unsightly than most of the Chienny Pots is use

Price £1:18:6

THE "EMPRESS"

Pryke's No. 1384.

The qualities of the Empress are two

well-almost to require weals descriptive.

Its assumes to due to de method of a surveyable head, which revelves methic; easy wind mannetening a consistent motion of air in the toba and tendinging the current by guidening sip, and grantally distributing the force of mobile gents of which. The section of anisons detect. The house-over, which anisons detect. The house-over, which we have been also detected to the day of the day

# PRYKE & PALMER'S IMPROVED STABLE FITTINGS.

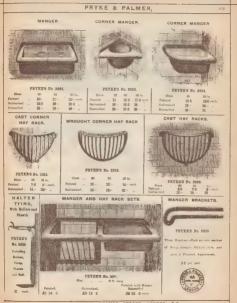

These Drawings show the interiors of Stables, and in the following pages enlarged illustrations and prices are given of the various finings, which comprise all the improvements, sanistry, reterinary and practical experience have deemed desemble, and doubted account be control approved of the Unde.

The prices have been kept throughout as moderate as is consistent with substantial quality and workmanship, for which the establishment of Pryke & Palmer is so justly & woos:

TILING

It is now the very excellent custom to hee good Stabler with non-shorbent glazed wall tiles. Turquoise, Celadon, sectral sites, Ivory and White, are favourise colours. See pages 345 & 6. If the stable is defectively lighted, light-coloured thes are ordently most watable.

47 & 48, UPPER THAMES STREET, LONDON, E.C.

### THE 66 I NEW TYPE (BARTHEL'S PATENT) METHYLATED SPIRIT

€. Absolutely Safe,

Steady and powerful fiame Most simple construction.

Explosion Impossible Burns in any position Ensily repaired.

LIGHTING HP THE "ROADER

THE " DOLDED " ACADHY

Instructions. The brass cup which fits on the container holds the correct amount of the pure Mathylatad Spirit necessary to charge the Roster. This charge is poured into the container, and the filling plug Rathyrana Spirit increasary to charge one manner. Anno coarge on powere into one contained, and one mining your at top screened down. In the bottom of the brass measuring cup is a small depression, which is then filled with methylated spirit and stood under the wick tube and lighted. The vapourit then issue from the blow pupe tube and methylated spirit and stood under the wick tube and nginted. The vapouts then issue from the nor are imited: as soon as the flame is sufficiently powerful, the brass cup is replaced on the container.

When renewing the wick the brass plate must be placed over the inlet to the small internal tobe, as this must always be kept clear of wick, and the wick pushed right up to the end of the wick tube.

#### THE "SUCCESS" 011 **GEYSER**

PATENT.

For use in Country Houses, and wherever Gas is not laid on or not approved We have at last the pleasure to sunounce a thoroughly "Successful" Oil Gereer,

Hitherto the difficulty has been that however carefully the wacks might be trimmed, they were always and to become irregular and smoke. And the trimming itself gave much trouble. Our "Success" has no wicks, but the oil is turned to gas and horns with a pure and smokeless flame. A result is thus obtained

which well warrants the name "Swocces."

As will be seen by the figures gives on next page the healing power of the different sizes is very nearly the same as that of gas, while the cost of the whole apparatus is very little more.

### THE "SUCCESS"

Is made in two patterns, known for distinction as "Success L." and "Success C."

In the L pattern the water flows through copper chambers carefully tinted, and does not come into contact with the fumes from the oil.

It is thus delivered at the spout quite pure and fit for drinking or cooking, The temperature may be also reused to Boiling at a minute's notice, and this pattern is therefore useful for every domestic purpose as well as for Baths.

It may be had to order of any required power, but is kept in stock ready for fastant delivery in four sizes, viz :--

> "Success" Geyser, C pattern. In the C pattern the water is not secured from contact with gas former, and therefore is not suitable for drinking but only for efeaning or Baths. The heating is very capid, but this pattern is

#### NO MORE ICY-COLD BED ROOMS!

PRYKE & PALMER'S NEW FIRE GLOBE

Supplies a long felt want. Complaints have often been made of the danger, especially to those affected bronchially, of retiring from heated sitting rooms to chilly had chambers.

The engrarings show the application of the globs, which will wares a room when fixed on any ordinary gas bracket. "The Fire Globs" may be than described. I globe shanket made of this stead or frequently provides in placed were commissed and jet, and converts the fixed man line a powerful beause over the the near community, so that a incremence packed II is below the globe will rule 20 depress in about the substant. There is no fine and no littings, a pure radiant beat being given off without small. It is claimed to be both somement and attences, and it can be safely left herming all night in a bedroom.

Pura Radiant Heat. Economical Efficient. No Smell. No Flue No Fettings

# IMPROVED LEVER BOLT

As used for all kinds of single or double Entrance and Conchhouse Gates, Main Doors of Public Buildings, Theatres, Fire Stations, and Government Offices, &c.

It will be seen in our illustration that by the simple operation of small to fasten or relates the three bolts, a great improvement from the old style of securing gates.

The dotted lines A shew an extension of the Top Bar for the purpose

of further securing a pair of gates, and it will be seen that this addition gives both a vertical and horizontal grip to the second gate.

The Top and Bottom Bars can be cranked to any angle, either way, to suit any make of doors, and should it be required only to shoot one or two ways, the middle bolt or the top one from B could be omitted.

Letter C on sketch above Keybole of Yale Paren Lock which can

be fitted if desired, but any lock pulse at Tate Tatest Door, when the be fitted if desired, but any lock pulse and to suit requirements. For inside doors and posteions where the bolt would be especially notionable, and to harmonise with elaborate surroundings, we suggest that the bus and guides be made in brass, polished, and the handle of burelshed gran metal. This greatly adds to its already elegant appearance.

gun metal. This greatly adds to its already elegant appearance.

The construction is very simple, and the bolt also forms a strong broding stay for weak doors or gates.

 $N_{\rm to}$  to harder to show you, which is best a ways, the  $N_{\rm to}$  to harder to show you, which is best a ways, the  $N_{\rm to}$  to harder to show you will be best a ways. We can be the short you way the short you way. We short you way, the short you way.

— EXTRAS. — Circular instead of straight handles, at &f- Iron; and 12/-Brass, each Patent Yale Lock adapted and a Keys, 15/-each

Perfections required when ordering:—Exact height of gate-whether gate has a top rail to not—and whether left or right hand at required—(drawing at left hand).

A tracing to scale is preferable.

A cracing to sense to proposes.

Architects and electric will oblige by inserting our full stame and address, and comber of belt in their specifications. Full size mounted sample will be sent for inspection, if desired.

SPECIAL SIZES TO ORDER

erector a correct drawing the angles out of

W R have much plessure as broug on before your native this Susske Epictur, which as a previousline of, and care five, smoothy channels clauses administrate not post-come by any other spriess.

The Epicial is noted upon sound securities.

The Ejector is mode upon soond countries promptyles. Its construction is such that a powerful up correct in created, and, as far as we know, has never failed to care the creat obstructe cases of debut-draught. The shief observed the so-collect.

The easer depends are an expensive their small probabilities. A self-insign confidence can almostly before the public at their smallphilitiess. A eliment word as beas in ceptainly not "a thing of beauty" nor "a joy for ever," and frequently become a perfect syrume and worse than seeless whose trusted about by storm and temport.

The Ejector is not placed on the chinney lot in it; being either disposed in from the top, as in the case of an old chinney, or fixed when that fact to being bath. All that can be seen of the Ejector when in position in the 2" x 3" air beinks, which are supplied ready parasets in brief or asson colour.

It is the old owying that Pervention in better than Cure, and

needs needynare world frequently be saired by architects specifying that the Specter shall be built into all new faces. It offset happens that a bestding in overeit emissivity and activity is every respect text one "the characters smoke."

The Ejector is already made of wrought iron, rivered tagether,

and is parfectly free pood, it cannot get out of order, in smally dised either in old or make chimneys and in manifested by some or main. Its action is simplicity itself, are naturing the specificity on wirected as brokes in deflorted nowards by the rurred plates, then In the mase of a goast of wand blow egdown the channey, the greater portion of the ner as cought by the upper plate and deflected out through the opening, what are passes the top plate in deflected in a sendar masses through the lower opening.

Chooseys fitted with the Epreter can be really swept. The plates are emply pooled spwards applies the brickwork (as aboven by disted hose in Drawing No. 2) by the breath, and dray into purchin again by these own weight when the heath is withdrawn. Should any dust collect on the upper miga of the plates a settlement of the breath of the collect of the plates as a subpect and the planter area (time the first in the

Unless otherwise endered the Ejector is supplied as as illustrations with frame shole for deepping into fine from abore. When required the behilk into a mar face is should be colored. "without norm." If on account of any unumental heading to the clowney stack it in downshis to fix the aux bricks at a lower level, the Ejector should be endered with "adjustable areas."

The Arr Breiks are secally fixed on opposite sides of chiralcy, but when this is improviouslis either the upper air leich is constituor they are fixed as in Fig. 3

A charact-pol of any ordinary description should always be used unless the Ejector is built into the flow as least time left from the top

### CHARTERIS & LONGLEY

ac, (PATENTS.)

The above is a skeleton plan, illustrating one of the many methods in which the blocks may be laid. When the blocks are laid in any desired pattern, the tongues BB enter the dovesail rabbets of the other blocks, and thereby bind them together in such a manner as to prevent the removal of any block, without displacing the whole floor.

This diagram gives isometrical view of block. The blocks are dovetail rabbeted on the under sides, as shown at A a, and continued to form tongues at B b.

This is a section of the flooring, as shown in previous block through a x.

## PULFORD'S DAMP WALL PAINT

(Non-Poisonous).

PULFORD'S DAMP WALL FAIN'S is the first and only paint ever introduced that will effectually keep out data pr of however long standing. It has been proved by the English Government, and the leading Architects and Builders throughout the would to be as hirtley lamp proof. A wall receiving two coats of this paint is immediately rendered darup proof; the most adicate wall paper can then be put on without fear of being a stroyed by the damp, as is at present the

FULFORD'S DAMP WALL PAINT is manufactured in one colour only (Chocolate), but any lighter shade of the Magnetic Paint, or ordinary distemper, can be applied over it, should the walls not require to be papered.

#### PRICES.

DAMP WALL PAINT ... 10s. per gallon, cans free. In 1-gallon, ½-gallon, and ½-gallon cans.

### To Makers, Dealers, and Users in Aerated Water Machinery—Home and Export.

### Important to Brewers,

Manufacturers of Aerated Waters

And Non-Intoxicants.

# The New and Important Discovery in the Mineral Water Trade.

The Proprietors desire respectfully to call the attention of Mineral Water Manufacturers to their New and Infallible discovery for the entire preservation of the old-fashioned and favourite Stone Ginger Beer.

Other Fermented and Unfermented Aerated, Summer and Winter Beverages, together with draught Beers of every description, Syrups, Expressed Juices, Cordials, etc., etc., are amenable to its great preservative powers, rendering it a most valuable requisition, and one that has long been wanted but never supplied.

# SUGAR OF BORON

"BORON" is an elegant natural product taken from the hot springs of ltaly, and found in the Lagons or ponds of Tuscany, an extremely fine powder of a light grey tint, odourless, tasteless, perfectly soluble, and of the most harmless character.

In submitting this new and valuable preparation to your notice, we do so with every confidence, feeling assured a trial will establish its superiority to

anything as yet prepared for a similar purpose. We claim for it absolute perfection. Chemically speaking it cannot fail.

The great principle in the manufacture of Fermented Ginger Reer is to suspend in solution the solid matter constituting part of its composition, and until this has been done, we maintain there is not a manufacturer in the universe who can justly claim superiority over his competitor in the keeping properties of Fermented Ginger Beer. Where the generation of spirit is so minute after fermentation, deperit will take place, and it is only by the suspension of the solid bodies in bright solution that this great cause of mischief can be arrested.

Deposit at all times is undesirable, but how much more so when **decorn-position** takes **place**, giving off and impregnating the beverage with a noxions gas, not only rendering the beer totally unfit for use, but entailing much heavy labour in having it returned, as well as great loss. These can all be obvirated by the use of our textured, as well as great loss. These can all be obvirated by the use of our textured in the state of the control of almost all fermented drinks becoming unsound and worthless hostics cause of almost all fermented drinks becoming unsound and worthless.

We beg to state the fine and certain action of our sugar will prevent eparation, and suspend every particle of solid matter in bright solution, rendering deposit chemically impossible, thus insuring you a product of standard quality and excellence, sound in constitution, and capable of remaining so for almost any length of time.

Four pounds will preserve 50 gross of Gipger Beer. Full instructions sent. Sample Packets of 4 lbs. forwarded post free an receipt of P.O. Order for amount.

Sample of 4 lbs. 5-; 56 lbs. 1/2 per lb.; Cwt. 1/- per lb.

BOYLE'S (LATEST

PATENT IMPROVED

#### SELF-ACTING AIR PUMP VENTILATOR REWARD

#### SUBSTITUTION. FRAHDULENT

IT having come to our knowledge that certain unscrupulous persons are attempting to secure orders from builders and others for BOYLE'S PATENT SELF-ACTING AIR-PUMP VENTILATOR where this Ventilator has been specified by Architects, and that such

persons have supplied, in some cases with the connivance of the contractor, INFERIOR VENTILATORS SPECIALLY "GOT UP"

to resemble as nearly as possible the EXTERNAL DESIGNS of the Air-Pump Ventilator. FOR THE PURPOSE OF MISLEADING.

we hereby intimate that, in accordance with the Merchandise and Train Marks Act. 1887 (50 & 51 Vic. ch. 28), any person supplying, causing to be supplied, or in any way representing or conniving at the employment of a Ventilator not made by us, as a "Boyle's Salf-Acting Air Pump Ventilator," is liable to fine and imprisonment for a term not exceeding two years. and to forfeit every falsely-teserthed Ventilator.

The usual modus operandi of these persons is to represent themselves as a ventilating firm or company, and issue speciously concerted circulars containing the

SPURIOUS DESIGNS, WITH MISLEADING TITLES.

and also price lists, upon which LARGE DISCOUNTS ARE OFFERED

particularly for IMMEDIATE payment.

FROM 25 PER CENT. TO 33; PER CENT. being usually allowed for cash. Calls are also made upon Builders, Plumbers, etc., in whose contracts it has been ascertained that the Air-Pump Ventilator is specified, with the object of

inducing the contractor, by MISLEADING STATEMENTS

to substitute the

INFERIOR IMITATIONS. which are invariably of the filmsiest construction, and roughest and cheapest manufacture In certain cases the wording and arrangement of the circulars issued greate the

ERRONEOUS IMPRESSION that it is the genuine Air Pump Ventilator manufactured by us that, is referred to and which would be supplied.

Bach Ventilator Manufactured by us has affixed to if the accompanying Trade Mark, without which none are genuine For the protection of our Clients' interest and our own, we will pay the sum of One Hundred Pounds sterling to any person furnishing evidence of any such infringement of our Patent or Trade-north rights that shall secure the conviction of the guilty parties.

By Order, ROBERT BOYLE & SON, LTD. LONDON & GLASGOW.

#### "Seandinavia"

#### Patent Cotton Machine Belting

(SOLID WOVEN)

#### ADVANTAGES.

Its sectional strength is greater than any other existing helt, the guaranteed average breaking strain of the Single and Extra Stout qualities being as follows -

Single .. .. Extra Stcut ... .. 1.500 lbs, per inch in width 2,600

It is absolutely uniform in section, insuring true running, with a total absence of vibration.

Is extremely pliable, and has a perfect grip on pulleys, Is unaffected by any even temperature or chemical fumes.

It does not slip when running in the wet.

Will run crossed or through guide forks.

The stretch of this Belting is exhausted, after having run for two or

three days; it will then run for years without giving any further trouble save an occasional dressing.

UNSURPASSED FOR
